

Lean Six Sigma Education

Green Belt Certification

Certified Lean Six Sigma Green Belts are globally recognised as skilled project leaders and valuable team members who deliver through their improvement projects sustainable results that matters to customers and their companies. They are knowledgeable about Lean Six Sigma methods and tools, and experienced in applying Lean Six Sigma methodologies in their work. Lean Six Sigma Green Belts use a structured fact-based problem solving approach, analytical methods, and leadership competence to lead small project teams. Six Sigma and Lean Management are nowadays common methodologies used to run improvement projects by many organizations around the globe.

Typical Candidate:

Lean Six Sigma Green Belts are professionals, who lead improvement projects in their functional areas, or participate as Green Belts on Lean Six Sigma Black Belt projects. Green Belt projects generally follow the **DMAIC** methodology where projects are properly **D**efined, problems **M**easured, thoughtfully **A**nalysed, **I**mproved, and finally **C**ontrolled in order to sustain improvements over time.

Green Belt Role:

- Drives process improvements
- Leads or participates on improvement projects in addition to their functional duties; they are generally not full-time project managers
- Collaborates with other team members, and internal or external business partners outside their own organization
- Assists Yellow Belts on their Lean Six Sigma learning journey

Core Competencies:

- Knowledgeable about Lean Six Sigma
- Expert in his/her respective areas
- Open to analytics and financial awareness
- Team player and leader driving improvements within the team and beyond
- Customer focused
- Results driven with a desire to implement
- Able to see improvement opportunities
